Plan for Next Week:
We are planning to work on Phase 2, R2M2D2 next week. We will prepare the required documents due to the changes in the requirements and also uncompleted requirements and analysis from Phase I, e.g. enchantments and its features. We will submit sequence and class design diagrams illustrating the use of at least two design patterns. We are planning to add some extra features to the project that makes the project more functional. These extra features will be finalized after Brainstorm phase. We will be completing our project at the end of this step.

Assessment of Success:

We were planning to complete Phase 1 Demo part of the project, and we accomplished what we were planning to do for the previous week. Since the last meeting, some of the main components of the project have been completed. The build mode and its interaction with play mode is completed. Monsters with their necessary features are defined. We especially were careful about maintaining the model view separation in this part of the project. In addition, we have completed numerous bug fixes during the coding step.

Open Issues & Questions:

➢ Are we expected to submit a report at the end of this Phase II? If so, what should be the content and its deadline?
